

Topic: Solving Equations		Essential Questions: <ul style="list-style-type: none"> How are the properties of operations used to solve multi-step mathematical and real-world problems? 		
Standards: <ul style="list-style-type: none"> 7.EE.3 Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form, using tools strategically. 		Students Will Be Able To <ul style="list-style-type: none"> Apply the properties of operations as strategies to solve one and two-step equations for a variable. Solve multi-step mathematical and real-world problems. Assess the reasonableness of answers using mental computation and estimation. 		
Vocabulary: <ul style="list-style-type: none"> Like terms, distributive property, expression, equation, properties of equality, positive numbers, negative numbers, estimation, substitution 		Assessment: <ul style="list-style-type: none"> Discussion questions Classwork practice with partners “Quick Checks” Test
